

# Symposium for Graduate Research

Department of Computer Science  
North Carolina State University

## Date

March 29, 2008

## Important Dates

Abstracts Due: January 11, 2008

Papers Due: January 18, 2008

Notification: February 22, 2008

Camera-ready: March 20, 2008

## General Chair

Sarah Heckman, NCSU

## Program Chairs

Evan Martin, NCSU

Paul Otto, NCSU

## Sponsors

## 1<sup>st</sup> Symposium for Graduate Research in Computer Science

“A Conference by Graduate Students for Graduate  
Students”

**March 29, 2008**

Raleigh, North Carolina State University

<http://agile.csc.ncsu.edu/sgr>

The goal of the 2008 Symposium for Graduate Research (SGR) in Computer Science is to disseminate emerging and established graduate research from across the United States to graduate students, faculty, and industrial partners, thus providing the opportunity for collaboration and external feedback.

The SGR invites high-quality research paper submissions from graduate students at all levels who are conducting computer science research. Submitted papers will be reviewed by graduate students on the program committee. Authors of accepted papers are expected to present their work at the SGR and will receive additional feedback from SGR attendees. Accepted papers will be distributed to attendees as well as posted electronically on the SGR website with permission of the authors. Authors will retain copyright of their work and accepted papers will be considered unpublished, similar to research technical reports. Thus, we encourage submission of accepted papers to more formal venues in the future.

Topics of interest include, but are not limited to:

- Algorithms
- Architecture
- Artificial Intelligence
- Compilers
- Databases
- Embedded Systems
- Graphics
- Human Computer Interaction
- Networking
- Operating Systems
- Security and Privacy
- Software Engineering
